*1996/97*

## *The Presidents Report*

It seems like only yesterday that I had the pleasure of most of your company at the clubs AGM where we managed to get through all issues without too many problems. Since then we have had two matches and yours truly is performing the task of defending the club title magnificently with a miserable two points. The club has definitely secured access to the new rowing course and the venue looks very promising.

**It is important that you read the changes to the clubs match calendar.** Since the last match the club has been asked to organise an open event in the ACT, unfortunately the proposed dates for the event could not be accommodated for due to a water skiing championship. The dates decided on in conjunction with the Vic boys for the open event are the 30th November and 1st December. Because of this the clubs match calendar has been altered so that our November match is now to be held in the ACT and the December match is at the Pound on the 15th.

At about the same time Stuart is trying to organise a trip to NZ, so you are spoilt for choice at the moment, it's up to you which one you attend.

On a brighter note it seems that the Carp issue ie. the killing of them is on the back-burner as NSW fisheries does not have the finance to fund an eradication program and that most anglers other than us can't be bothered. Hopefully, enclosed with this magazine is a fisheries questionnaire so do yourself and the club a favor and send it in complete of course to the department.

On a final note a publicity flyer has been produced by David Kowalick which is to be included in the fisheries magazine and to be provided to tackle shops, in an attempt to raise the profile of our sport and the club. When they are available if you want any give me or any committee member a call.

Regards Steve.

# SPECIMEN ANGLERS FEATURE

23 June 1996

DATE:  
23 JUNE 1996

DAY:  
SUNDAY

VENUE:  
PARRAMATTA  
PARK

WEATHER:  
OVERCAST &  
SHOWERS IN  
AREA

PRESENT:  
ERIC  
WILBACY

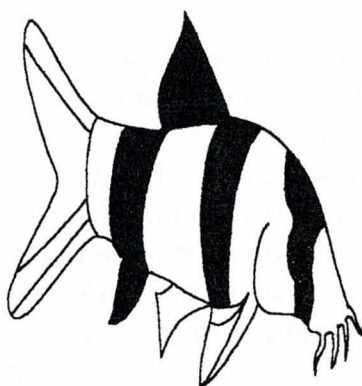

ROBIN  
BALBARD

HOWARD  
HILL

NARRATED  
BY HOWARD

## CARP AT THE PARK.

SUNDAY AFTER THE AGM, ERIC WAS SUFFERING FROM WITHDRAWAL PAINS FROM LACK OF FISHING, AND SUGGESTED WE GIVE PARRAMATTA PARK A GO, SO WITH OUR NEW MEMBER ROBIN, WE GAVE IT A GO.

NEXT TIME ROBBIN, BRING  
SWEETCORN.  
LESSON NO. 1

ARRIVING AT 7AM, I WAS THE FIRST, WITH ROBIN RIGHT ON MY TAIL. ONCE ERIC ARRIVED, WE FIRST WALKED THE BANK TO CHECK OUT THE PEGS. ONCE DECIDED WE WALKED BACK TO OUR CARS IN THE CARPARK NEXT TO THE OLYMPIC SWIMMING POOL. ERIC AND ROBBIN WENT BUSH BEHIND THE STADIUM, WHILE I SETUP NEAR THE CARPARK SO RICHARD COULD FIND ME WHEN HE TURNS UP. FISHING WAS SLOW AT FIRST, WITH THE WEATHER HAVING FOUR SEASONS IN THE ONE DAY, SOUNDS LIKE THE UK. ABOUT ELEVEN, THE LOCAL BUTCHER FROM GEORGES HALL, BROUGHT HIS SON DOWN TO SEE OUR STYLE

OF FISHING, WITH ROBIN GIVING THEM A DEMO WITH HIS POLE. RICHARD ARRIVED AND LEFT JUST AS QUICK TO ORGANISED DAWNS BIRTHDAY PARTY. CONDITIONS TODAY WAS THE WORST I HAVE EVER FISHED IN, WIND GUSTING TO 35 KNOTS, CREATING WAVES ON AND OFF. WITH 13 ASSORTED CARP, UPTO 8LBS, APPROX. 65LBS IN THE NET, I CALLED IT A DAY.

ERIC HAD A GOOD DAY, BUT NO SPECIMEN TO TALK ABOUT. ROBIN EVENTUALLY LANDED 3 CARP, PLUS NUMEROUS EELS AND TURTLES, BECAUSE HE LEFT HIS SWEETCORN AT HOME, DIDN'T HE, AND HAD ONLY MAGGOTS TO FISH WITH.

# Sydney Coarse Angling Club

## Match - Section Scoring

In order to increase interest in match events, this year has been agreed to introduce, on a trial basis, *Section Scoring* as well as the usual scoring. *Section* scores will form a **separate** table and will **not** be added to the *Match* table.

- ⊗ One point will be awarded to each section winner. No points for second or third will be awarded. At the end of the year the angler to accrue the highest number of points will be the winner.
- ⊗ If two or more anglers have the same number of points, the total weight of fish caught in the year will determine the winner.
- ⊗ Prize: to be determined by the committee [it may be a trophy or a cash prize: a once-only entry fee may be charged].
- ⊗ The number of sections will depend on the number of participants and on the venue.
- ⊗ All pegs in a section will be sequential.
- ⊗ The minimum number of anglers in each section is 4.
- ⊗ The maximum number of anglers in each section is 6.
- ⊗ If a duly assigned peg is left vacant, such peg WILL count in the relevant section.
- ⊗ ALL 12 matches can accrue points.
- ⊗ All other rules of match fishing will apply.
- ⊗ All rules will be reviewed at the end of the year

Possible layout: [No of pegs: No of sections x No of anglers]

10: 2x5

11: 1x5 + 1x6

12: 3x4

13: 2x4 + 1x5

14: 1x4 + 2x5

15: 3x5

16: 4x4

17: 3x4 + 1x5

18: 2x4 + 2x5 OR 3x6

19: 1x4 + 3x5

20: 4x5 OR 5x4

21: 3x5 + 1x6 OR 4x4 + 1x5

22: 3x4 + 2x5

23: 2x4 + 3x5

## *From hero to zero*

### *Match Report Werrington*

*7 July 1996*

For several months my confidence about catching fish during matches has been reasonably high culminating in the momentous lifting of the club championship. As you may expect I approached the match at Werrington with a degree of the usual self importance as most of you know. All looked well for the day with calm conditions and sunshine forecasted.

Fluro and myself pegged the venue and took advantage of the bulrush matting left when the council chopped out the offending weeds, the sections were set up and the draw was on. This is easy I thought as I drew peg 1 in the corner with the bridge after all this peg was one of my favorites as I know where the features are and usually where the fish hold. Howard the Gobbledock Hill drew peg two which was on top of the bulrush debris and immediately declared his peg unfishable as he sank into the mud. What me and fluro forgot was that John is only slightly lighter than Howard and his gear, anyway after a quick discussion Howard moved to the right of me taking away my end peg advantage, not a problem I thought.

The all in sounded to find me without having completed my set up, I had not even managed to open a tin of corn, not a problem I thought. Howard told me that Ron had caught as he slipped his first carp into the net, not a problem I thought. At about ten Robin was observed to bend the pole into the overhanging trees and still land the fish, not a problem I thought. Howard landed another fish and Robin continued to catch on the pole, not a problem I thought. At the end of the match not only had I blanked but I also managed to fish for five hours and not even get a bite, oh f###K I thought. The post match humor and usual condolences saw all blank bar Robin and Howard so Ralph you missed nothing and all that opposed changing the first match date blanked. CZICHON'S revenge.

Steve

## Sydney International Regatta Course

### 112 The Leisure Day Report

21 July 1996

For several months now most of you will have listened to me raving about this venues potential and so today the first of our hopefully many visits took place. Peter Byron the manager of the course teed it up so that we would meet the Ranger at 8.00am, unfortunately Howard did not get the message and fronted at the crack of dawn (I can say this now that Richard has returned to the UK ). The ranger turned up right on cue, for the life of me I can't remember his name, but a nicer bloke you could not meet, although his eyes misted over just slightly when I did a Rex and pretended to kiss old rubber lips before letting him swim away.

It was decided that we would split into two groups so that the practice course and a retention lake could be sussed to enable the venue management and the club to appraise the options. The gobbledock popeye and I took the soft option by fishing the retention lake out of the howling wind, while Eric, Fluro, Mr t, Robin, and John, fished the practice area. You now know why I titled this half a report as Eric will provide a report on the events at his section.

The retention lakes banks are devoid of trees and the water is in a huge hollow so it's mostly sheltered from the wind. Howard and I sat with what wind there was at our backs while Ron fished about 200 meters or half way down the bank. Where Ron was fishing was bottomless at 4 rod lengths, 10' at 3 and 6' at 2, I had about 8' at 3 with a sloping bottom while Howard had 4-5' across the swim. Ron chased carp, while Howard and I went for eels as well as carp. After the first pouch of maggots the water started to boil with small fish so Howard and I set up whips and produced Australian Smelt. After an hour I managed an eel of about 6lb and Ron got his first carp of about 8lb followed by another of 14lb. That was about it so at 1.00pm we decided to visit the others to find 2 foot waves and only Eric and Robin still clinging to there box in the galeforce wind. The fishing was much better at this area than the retention lake with all catching carp probably in excess of 150lb between them. I managed to poach a common of about 4lb on Robins gear to win the day with three species.

On a personal note thanks Eric for the whip and thanks Mark for thanking me for my efforts to gain access to this venue it's nice to know I am appreciated at least for some of the time. For those of you who noticed the garbage bags containing dead carp I will be trying to stop this by using sense and reason, however please don't try to change things by getting all hot and bothered as it looks like this venue will be the first catch and release water in Aus probably because our rules were used as the basis for the management policy.

Regards Steve

## The Leisure Day at Penrith Lakes

In atrocious conditions, eight members fished the Penrith Lakes complex on Sunday, 21st July.

With winds gusting to 50 Kph and temperatures around 11°C, it was clearly not going to be an auspicious start to the first visit to this venue, or so we thought.

The complex currently consists of three lakes, all of which are joined.

There is a rowing course of approximately 100 acres, the practice lake of about the same size and the top up lake which I estimate to be between 7-10 acres.

Five members fished the eastern end of the practice lake whilst three fished the top-up lake.

Like the Carrum Rowing Course in Victoria, the practice lake has a ledge of 5' to 6' in depth, dropping away to 12'+ at about three rod lengths out. The only exception noted in the areas fished, was the extreme eastern end of the lake where the drop off is much further out.

The predominant baits used were corn, worm and bread, with corn being the most successful.

A variety of methods were used including feeder and straight ledger but a waggler, either fixed or sliding, was the most successful method on the day.

A total of 16 fish were caught on the Practice Lake, all of which were Common Carp.

Robin Ballard and Mark Triston who fished in the deep water over the shelf with sliders, produced fish to 10 lb with the average being in the 5-7 lb range.

I was fishing a fixed waggler in the shallow Eastern end of the lake and took four fish, the biggest of which weighed 14 lb.

In the top-up lake Ron Waites had two Common Carp, the largest of which scaled 14 lb. 7 oz., while Steve and Howard produced Australian Smelt and long finned eels.

Reflecting on the day, the fact that so many fish (21 in all) were caught under such conditions makes it clear that this is a venue of considerable potential.

The species caught obviously reflect the baits and methods used and future outings to the complex should focus on live baits to determine if bass or other predatory species are present.

The complex itself is a tribute to the controlling body, the water quality is excellent as is the layout.

This facility has enormous potential as a leisure and match fishing venue and in it we have in N.S.W. for the first time, a venue which could hold major competitions of over 200 pegs, such as the Australian National Championships or even the World Championships.

I believe it is important that we make the management of the complex aware of the contribution that recreational fishing could make to the economic viability of the complex.

Clearly the capital cost of such an enterprise, as well as the ongoing cost of maintenance, means that the complex should support as wide a range of fee paying activities as possible.

We should also, I believe, point out that the indiscriminate removal of species such as Carp could damage the waters potential as a fishing venue.

On behalf of the Club, I would like to thank the Penrith Lakes Corporation for the opportunity to fish the complex and, in particular, the Ranger Jason Brown for this help and interest on the day.

22 July 1996.

Steve Scott President SCAC Inc.  
4/155 Cooper Road Yagoona  
NSW. 2199  
Tel. (H) 6452036 (W) 3906330

**Dear Peter,**

Thankyou for the opportunity of attending the Sydney International Regatta Center for the purposes of conducting an experimental Coarse Angling visit to determine fish type, water quality, and if the venue is suitable for conducting match angling events etc. Although the wind conditions on the day of the visit were very unfavorable for angling we were able to determine that SIRC. is without question the best potential venue in Sydney and would be in the top 5 in the Australian Coarse Angling arena.

The fish species captured on the day of the visit were Australian Smelt, Long Finned Eels, and Common Carp, it is presumed that Eel Tailed Catfish, Galaxia and Mirror Carp are also present, this presumption is based on the clubs attendance at Wheelers Lake. All fish caught were inspected before release and were found to be in excellent condition with no parasitic infestation found. The water quality was found to be good with little turbidity despite the conditions, combined with this plant and other aquatic life such as Cormorants and Ducks seem to regard the venue favorably. One issue that might require attention at the venue is that of Ribbon Weed which if unchecked may overgrow the margins and shallower areas of the lake system.

One aspect of the SIRC. that was not appreciated was the sight of garbage bags full of dead Carp. The removal of Carp from this venue in our opinion is unwarranted and indeed may be creating a larger problem for the Penrith Lakes Development Corporation. Because of the construction of the lake system and the structures within the Carp will not cause damage to the banks, etc. and the removal of the species is an unrequired financial burdon that is detrimental to the asset that Carp provide in terms of national and international competition.

The Sydney Coarse Angling Club has no problem with the control of Carp where they are in plague proportions, however this is not the case at the SIRC. and the removal of large Carp will allow for the proliferation of small fish. It is respectfully suggested that fish stocks need to be managed appropriately i.e. leave the Carp alone and introduce a predatory species such as Australian Bass (as approved by NSW Fisheries ). This measure will result in an aquatic system that is balanced between large Carp and large Bass, as the Bass will keep the Carp population in check by feeding on fingerlings. It should also be noted that Carp and Bass do not generally feed on the same part of the

aquatic food chain and that the Carp population may assist in keeping the Ribbon Weed issue to that of financially viable proportions. Further to this it should be noted that Bass do not reproduce in still water, and because of the Cormorant population and the potential removal of these fish by the general angling population will have to be stocked on a regular basis. For further information on fisheries management issues Mr. Bill Talbot NSW. Recreational Fisheries Manager can be contacted on (02) 5667863. On a final note at present there is no requirement to kill Carp upon capture in NSW. and as such a strict catch and release policy as you have previously mentioned is both logical for all fish and not currently in conflict with either statute law or National or International Coarse Angling rules.

Once again thank you very much for your cooperation, the SIRC, is an excellent venue with undoubted national and international potential. I will be in contact with you in the near future to arrange a second visit to determine the retention lakes potential prior to our planned match competitions. If I or the club can be of any assistance in the future for stocking information or other issues please do not hesitate to contact the undersigned.

Yours Faithfully

A handwritten signature in black ink, appearing to read 'S. Scott', written in a cursive style.

Steve Scott President SCAC. Inc.

## Parramatta Pound 04/08/96 - Match report

After the poor results of the Werrington Lake match, most anglers were looking forward to today's match for some serious fishing. It hadn't rain for a few days and the weather forecast for a sunny day was more than encouraging. So much so that we had the largest turn up for a LONG time, with 15 participants. But the devil decided to throw a spanner in the works by adding strong gusty winds to what would have been a rather nice day fishing.

Most people decided to leave the pole in the bag, and this is indicative. Soon, despite being on the sunny side of the river, I witnessed a pilgrimage of anglers going back to the car to get more clothing, some were holding on to their umbrella and I made sure that I put all my lead in my pockets. Ron (had drawn the end peg) braved the elements and used successfully the pole by fishing close to the banks. At my end Mark, that for once had the luck of the draw (No 1), was quietly but quickly drawing attention (both of passer by and of envious fellow fishermen) with numerous catches. Steve thought that he was doing all right fishing with pole 11 metres out until one good gust of wind spun him out and almost picked Michael's nose.

Andy decided that had better things to do and packed up early, while I hung on and eventually caught a tiny eel (which a was praying would not bite me off) to give me a whole 7.5 ounces and one point. Needless to say the "all out" could not come quickly enough for most. Mark had to wait quite a bit to find out whether he had won or not, but the only real contender was Robin (yes him again), that could afford to lose an eel through a hole his keepnet and still get second spot (only a few ounces behind Mark). And if he continues this way (2 wins and 3 second spots out of five), we might have to consider a handicap system for our scoring. Also doing well at this stage is Howard that consolidated his second spot on the ladder.

So now we are all eagerly waiting to fish the Olympic Rowing Course at Penrith. In a trial not long ago, it produced well in conditions as bad as at the Pound, with plenty of LARGE fish caught; so if the weather is touch more merciful, we should have a great time. But **REMEMBER**, that access to this venue on the day of the match will be restricted. A security guard will open the gates for us and then he will **LOCK** them up again behind us. **MEETING TIME IS 6.30 AM**, but I suggest that you aim to get there at 6.15 am. It is also best that you confirm with me (or other members) that you are coming. **DON'T BE LATE OR YOU WILL BE LOCKED OUT.**

See you there.

Fluoro

**SILVER DIAMOND - Specialist Leger Reels**  
The silver diamond is the only reel designed specifically for anglers using advanced swimfeeder or leger techniques. Its extra strong steel main shaft and machine cut gears will make mince meat of your current leger reels. The high speed 5:1 ratio is great for speed fishing and long range work while the micro-adjustable drag setting on the drag knob lets you set the drag to suit your fish. It has maximum and minimum setting for your chosen fish.

#### Features include:

- Three ball bearings
- Micro adjustable front drag
- Longstroke tapered spool
- One touch folding handle
- 12 point visual drag setting
- Steel reinforced drive shaft
- Steel drag washers
- Steel ball mechanism
- Longlife ceramic roller
- 5 year guarantee

## Bass to reclaim their water, without carping

By SIMON BENSON  
Environment Reporter

IT'S war. A David and Goliath battle for supremacy of Sydney's major water supplies has begun between two of the most aggressive fish species alive.

On one side is the giant introduced noxious carp which grows to 14.5kg and has infested Fitzroy Falls dam, threatening the water quality of one of Sydney's major supplies.

On the other is a 50,000-strong army of 5cm baby Australian bass — regarded as one of the best fighting fish in the world.

Yesterday the predatory bass, once native to the area before it was dammed, were released by NSW Fisheries and Sydney Water in an experiment to cull the carp using another predatory species.

"Fitzroy Falls is a crucial back-up water system and the carp have the potential to reduce

Dauids . . . Australian predatory bass

the water quality," a Sydney Water spokesman said.

"A bottom dweller, they increase turbidity and destroy the ecology of the system."

Carp have also infested, to a lesser extent, Warragamba catchment — Sydney's main water supply.

It is hoped the bass, which experts claim "are smart and will bite at anything that moves", will eat immature carp and larvae almost immediately upon entering the water.

If successful, it could be a breakthrough in a long battle to control carp in NSW waterways.

*President's comment  
Good on fishies for  
sticking Bass!*

*I wonder - if the bass  
are going to gang up  
on the bigger carp  
or hire in piranhas  
to do the deed of  
control?*

## DRENNAN FISHING RODS - 3D

# **SYDNEY COARSE ANGLING CLUB Inc.**

*Minutes FOR ANNUAL GENERAL MEETING*

*Friday 21 June 1996 Family Inn Rydalmere.*

## **Meeting Procedure.**

### **1. *Presentation of existing committee members 1995 reports.***

The various reports were presented as part of the yearbook, the treasurer provided a financial statement of \$2,413.60 subject to moneys paid out for the AGM.

### **2. *Those present.***

M Triston, A Hicks, B, Edmonson, J Draper, S Scott, R Czichon, S D'Ombrian, B Childs, J Davis, R Ballard, M Winton, D Richardson, D Kowalick, H Hill, P Shire, R Crake, J Alimeni, E Willacy.

### **3. *Apologies.***

S Deans, D Arnold, R Waits, M Williams, C Draper.

### **4. *1996\1997 Committee members elected.***

S Scott - President  
P Shire - Vice President  
S Deans - Club Secretary  
H Hill - Treasurer / Public Officer  
J Alimeni - Match Secretary  
E Willacy - Leisure Secretary  
J Davis - SAS Secretary  
D Kowalick - Assistant SAS Secretary & Saturday teams co-ordinator

### **5. *Confirmation of minutes of previous meeting.***

The minutes of the previous meeting were confirmed as a true record on a motion by J Draper seconded S D'Ombrian.

### **6. *Business arising from A.G.M.***

- 1: 1/93-94 S.C.A.C. Christmas Party (submitted by J. Dockerty)**  
Coordinator for 1996\97 Christmas party to be appointed at A.G.M. S D'Ombrian volunteered to organise party probably at the Family Inn.

**ACTION** S D'Ombrian.

- 2: 1/93-94 N.S.W. Fisheries (Submitted by S. Scott)**  
No change i.e. dispensation granted for matches only. Current N.S.W. freshwater laws are under review which may result in a better deal for the club.

**ACTION** S. Scott to continue to pursue.

- 4: 3/94-95 Access to venues (submitted S. Scott)**

New venues have been secured. It is suggested that this item stay on the Committee minutes as part of an ongoing issue. Any new venues will be communicated to the club, further to this it was decided that the Leisure Day events where possible will be used to explore new venues.

**ACTION** S.C.A.C. Committee, E Willacy.

- 1: 5/95-96 S.C.A.C. Profile (submitted E. Willacy)**

S.C.A.C profile to be raised. H. Hill to place advert in Freshwater Fishing Magazine using Stuarts P.O. Box number, completed. It was further decided that D. Kowalick and the committee will raise the profile of the club via the media, provision of promotional material, an instructional sign and P Shire agreed to organise kids clinics using donated coarse gear.

**ACTION** D Kowalick, P Shire & Committee.

- 1: 1/95-96 A.F.C.A.A. Inc. Membership (submitted S. Scott)**

Due to increasing club membership and the requirement of maintaining a 60% individual S.C.A.C. membership of the A.F.C.A.A. Inc. it was decided that the S.C.A.C. will subsidise all individual club members the full subscription cost ( \$12) of being member of the A.F.C.A.A. Inc. Agreed unanimously

**ACTION** H. Hill.

- 6: 1/95-96 Teams event Parramatta**  
D. Kowalick & E Willacy to organise.

- 7: 1/95-96 Sponsorship of members at National event**

The committee decided to use some of the raffle money to assist members. The idea of assisting members to attend interstate events etc was ratified unanimously provided that the money used is only that raised via the raffle. The committee will be responsible for the allocation of funds.

**ACTION Committee**

**1: 3/95-96 Division of club funds (submitted S. Scott)**

To facilitate the sponsorship of club members as per 7: 1/95-96 it is suggested that the club funds are divided into an administration fund consisting of membership and match fees etc, and a fund consisting of any raffle moneys raised. The admin fund will only be used to pay for normal club expenses such as the purchase of trophies etc. Is this ok?  
Carried Unanimously.

**ACTION Committee.**

**2: 3/95-96 Payment of reasonable expenses (submitted S. Deans)**

During the organisation of this years Trans Tasman event S. Deans made \$67.00 of telephone calls to NZ. This money will be refunded to Stuart as per the club constitution. The reason for this items inclusion is to highlight that personal expenses will be more commonly reimbursed as the club develops its activities.  
Ratified by meeting.

**3: 3/95-96 Removal of one off S.A.S. \$5.00 fee (submitted S. Scott)**

Given that only some members are financial members of the S.A.S. anglers section and no records have been kept, and that anglers not members of the S.A.S. may only want to participate in a one off session. Its suggested that the \$5.00 joining fee be removed.  
Carried Unanimously.

**ACTION Committee**

**4: 3/95-96 Match starting times (submitted S. Scott)**

Because of the problems experienced relative to the match draw at 5.45am. in the latter stages of daylight saving it is suggested that one of two solutions be considered;

1. All draws to be conducted at 6.45am year round.
2. All draw times to be determined by match secretary given available daylight.

The proposal that all match draws be started at 6.45am year round was carried unanimously.

**ACTION Committee.**

**5: 3/95-96**

**Increase of club membership fees (submitted S. Deans S. Scott)**

To cover the additional costs of running the club on a successful basis it has been suggested that membership fees be increased to \$37.00.

However to accommodate for the quarterly reduction for new members joining the club it is further suggested that the fees be increased to \$40.00.

This proposal was amended on a motion by E Willacy that the club fees not be increased until such time as an expenditure budget has been compiled by the committee and an increase is deemed necessary. This motion was passed unanimously.

**ACTION Committee.**

**6: 3/95-96**

**Landing of fish S.A.S. leisure events (submitted S. Scott)**

On several occasions throughout 95-96 club members have been observed to struggle when attempting to land large fish. It is suggested that if an angler requests help while playing or attempting to land a fish, then if assistance is provided that the fish be counted for any trophies as per other club rules. This requires a rule change, any comments? (This possible change should not apply to matches)

Agreed unanimously.

**7:3/95-96**

**Review of Specimen Weights (submitted S. Scott)**

Given the recent capture of several large fish it is suggested that the new committee review specimen weights and adjust them accordingly. Agreed unanimously, any fish caught prior to next committee meeting will be subject to the revised weights.

**ACTION Committee**

**8:3/95-96**

**Certification of Club Scales (submitted D. Kowalick)**

To enable club members to claim for AFCAA and other national records it has been suggested that club scales be calibrated. C Draper to be contacted to get scales certified.

**ACTION Committee & C Draper**

**9:3/95-96**

**Associate Membership Fees (submitted D. Brown)**

A clear ruling is required as to how much an associate member should be charged, and what rules re-angling be applied. This is required to enable overseas anglers to remain in the AFCAA and receive the benefits of being part of the SCAC.

The following was agreed ;

Associate Fees \$20.00

Associate members are non voting  
Associate members must adhere to club rules including qualifying rules  
Associate members must reside outside of NSW & the ACT.

**ACTION Committee**

**7. Correspondence in and out. N/A**

**8. General business / new items.**

**10:3/95-96 Nepean Herring (submitted R. Waits)**

Because of the fragile nature of these fish a ruling was asked for as to whether they should be allowed in matches. It was agreed that Nepean Herring be banned from matches. A Hicks protested.

**11:3/95-96 SAS & Leisure events to be combined (submitted H Hill)**

This proposal was strongly opposed by S Scott and others, however it was agreed that any record fish caught in any event will receive a trophy as recognition. If the same record is broken more than once the larger fish capture will be awarded only.

**12:3/95-96 Section winners in matches (submitted M Triston)**

It was agreed that this was a good idea and the exact rules etc will be determined by the committee and announced asap.

**ACTION Committee**

**9. Date and time of next meeting. TBA.**

**10. Close of meeting. 10.20pm.**

Signed.

President S.C.A.C. Inc.

The committee decided to use some of the raffle money to assist members. The idea of assisting members to attend interstate events etc. was ratified unanimously provided that the money used is only that raised via the raffle. The committee will be responsible for the allocation of funds.

**ACTION** Committee

- 5: 3/95-96      Increase of club membership fees (submitted S. Deans S. Scott)**  
To cover the additional costs of running the club on a successful basis it has been suggested that membership fees be increased to \$37.00. However to accommodate for the quarterly reduction for new members joining the club it is further suggested that the fees be increased to \$40.00.  
This proposal was amended on a motion by E Willacy that the club fees not be increased until such time as an expenditure budget has been compiled by the committee and an increase is deemed necessary. This motion was passed unanimously.  
It was agreed following the presentation of an expenditure budget that an increase is not required at the present time. This will be reviewed prior to the next AGM.

**ACTION** Committee.

- 7:3/95-96      Review of Specimen Weights (submitted S. Scott)**  
  
A review of the specimen weights was undertaken during the meeting with changes to the Brook Trout and Goldfish weights. See new table. It was also decided that any new species be positively identified using a camera or an appropriate reference book.

- 8:3/95-96      Certification of Club Scales (submitted D. Kowalick)**

To enable club members to claim for AFCAA and other national records it has been suggested that club scales be calibrated. C Draper to be contacted to get scales certified. C. Draper is currently certifying the scales.

**ACTION** Committee & C Draper

**9:3/95-96 Associate Membership Fees (submitted D. Brown)**

A clear ruling is required as to how much an associate member should be charged, and what rules re-angling be applied. This is required to enable overseas anglers to remain in the AFCAA and receive the benefits of being part of the SCAC.

The following was agreed ;

Associate Fees \$20.00

Associate members are non voting

Associate members must adhere to club rules including qualifying rules

Associate members must reside outside of NSW & the ACT.

**ACTION** Committee

**1:1/96-97 Purchase of new club shirts & caps (submitted S. Scott)**

Pete Shire has organised the purchase of new club shirts and caps. The committee should set an appropriate price for these items.

Price set at \$25 per shirt & \$15 per cap.

**ACTION** Committee.

**2:1/96-97 Organization of Canberra event (submitted S. Scott)**

The SCAC has been asked by the AFCAA to organize a major event in Canberra on the 7 & 8 of December. Because of the complexity of such a task assistance in the organization would be appreciated. Committee to discuss options.

H. Hill, J. Alimeni, D. Arnold & S. Scott are to organise the event.

As a result of this event being staged the club match venues have been changed - 2nd & 3rd November club events ACT, - 1st December match Pound, the leisure day on the 17th at Eaglevale is unchanged.

## *Australian Federation of Coarse Anglers Association Inc.*

---

Dear Angler

At the 1996 A.G.M. it was accepted in principle that the Federation should take up the offer of "HOOKED ON ANGLING" magazine to have a newsletter in exchange for subscriptions to the publication.

The mag. is bi-monthly and retails at \$3.95. The Federation has been offered an extra 2 pages above the 2 that Bob Waldock and myself write plus the input written by Terry Sheppard.

Some of the subscription cost will be covered by the membership fee as all membership correspondence will go through the Mag. A normal subscription would cost \$35.50. The Federation have been offered a price of \$22.70. With the refund from your membership the Federation can offer the subscription at \$18.00.

The Magazine gives a any member the opportunity to have input. Why not write a profile of yourself, your Club, a fishy story about you and your mates. It will be tidied up if it needs it and published. Along with this will be all the Federation info. This will be the only place entry forms for the Nationals will appear. All 1997 match calenders. Club and Federation results. The Official State and National Specimen fish claims. Details for the World Championships. This will be the last correspondence that will go out to the general membership. If you don't know what is going on it's because you haven't read the Mag. Without subscriptions we will loose this opportunity. This year we can only ask that you voluntarily fill in the form below and pay the \$18.00 **For the 1997/8 year we hope we can keep the cost to a total of \$30.00 for membership.** An arrangement for non Victorian based anglers, Juniors and Pensioners can be made. By volunteering to take out a subscription this year it is hoped that interstate anglers will see the benefit of what is a Victorian based Magazine. Maybe they will not ask for any special arrangements next year.

***PLEASE DELIVER MY COPY OF "HOOKED ON ANGLING" TO-***
